

[illegible]

A cross-section diagram of a road. The road surface is a straight line with a 10% downward slope from left to right. The left side of the road is a 1:1 slope, and the right side is a 3:1 slope. The road is 10m wide at the top. The diagram shows the road's profile, the 10% grade, and the 3% side slopes. The road is 10m wide at the top. The diagram shows the road's profile, the 10% grade, and the 3% side slopes.

Technical drawing of a road cross-section. The drawing shows a road with a 10m wide road, a 3m wide shoulder, and a 3m wide ditch. The road has a 3% grade, the shoulder has a 3% grade, and the ditch has a 3% grade. The drawing includes dimensions and a scale bar.

Diagram illustrating the cross-section of a bridge deck. The deck is divided into sections with the following dimensions (from left to right): 0.40, 1.00, 0.73, 3.73, 3.00, 3.50, 3.00, and 0.5. The centerline elevation is 375.78. The left side slope is 8.0%, and the right side slope is 8.0%. The bottom slope is 3.00%. The left abutment elevation is 375.45, and the right abutment elevation is 375.15. The deck is shown with a hatched pattern, and the side slopes are indicated by dashed lines.

Technical drawing of a drainage system showing a cross-section of a road and a drainage ditch. The road surface is marked with a 3.00% slope. The drainage ditch is marked with an 8.00% slope. The drawing includes dimensions for the road width (3.75m) and the ditch width (3.50m). The elevation of the road surface is 375.79m and the elevation of the ditch bottom is 375.15m.
